PROFESSIONAL SUMMARY

Highly versatile and analytical Business Information Technology specialist with certified expertise across the full data lifecycle and modern software development. Skilled at bridging the gap between raw data, business intelligence, and technical implementation. Experienced in querying large relational databases, writing automated data cleaning pipelines in Python, and building interactive, performance-driven dashboards in Power BI and Tableau. Proven ability to design and deploy full-stack mobile and web applications, integrate secure payment APIs, and collaborate with cross-functional teams to translate complex data and user requirements into reliable, scalable technical solutions.

CORE TECHNICAL SKILLS

- Data Analytics: SQL Database Query Optimization, Python Programming (Pandas, NumPy), ETL Pipelines, Quantitative Data Cleansing, Data Validation, Statistical Modeling
- Business Intelligence: Power BI Tabular Data Modeling, DAX Programming, Tableau Dashboard Design, KPI Monitoring, Narrative Storytelling, Ad-Hoc Analytics
- Software & Database Development: JavaScript/TypeScript, Next.js, React Native, RESTful API Integration, MySQL, PostgreSQL, Oracle SQL Schema Configuration, Git/GitHub Version Control
- Operations & Project Management: Agile/Scrum Methodologies, Systems Diagnostics & Testing, Technical Documentation (SOPs), User Training & Support

PROFESSIONAL EXPERIENCE

Data and Digital Marketing Consultant | Freelance / Remote

March 2020 – July 2025

- Gathered, consolidated, and processed operational and commercial data from multiple systems, APIs, and spreadsheets to ensure database integrity.
- Cleaned and preprocessed unstructured performance datasets using Python, identifying discrepancies and establishing standardized data-quality workflows.

- Designed and built interactive visual dashboards in Tableau, Power BI, and Excel, translating complex commercial metrics into clear, actionable business insights for local SMEs.
- Integrated analytics and transactional APIs into existing web platforms, writing optimized database queries to automate performance tracking.

IT and Systems Maintenance Intern | Kenpro Kenya, Nairobi

January 2026 – May 2026

- Supported software performance diagnostics, network configuration, and system testing prior to production deployment.
- Managed hardware, printer, and connectivity diagnostics, providing first-level technical helpdesk support to minimize user operational downtime.
- Monitored local area networks, verified database compliance with standard security protocols, and successfully isolated malware threats.
- Designed and led digital skills training workshops for staff, preparing clear standard operating procedures (SOPs) and troubleshooting guides.

SELECTED PORTFOLIO & DEVELOPMENT PROJECTS

(Peer-reviewed, hosted on GitHub, and visualized on Tableau Public)

- Naulify (Full-Stack Fintech Solution): Designed, developed, and deployed a digitized payment and transaction platform using Next.js and React Native. Built and managed relational SQL database backends, integrated secure third-party billing APIs, and utilized Git version control to manage product development.
- Interactive Visual Analytics (Tableau): Designed interactive dashboards to model complex metrics, demonstrating the ability to translate consumer and market datasets into visual narratives that non-technical managers can read at a glance.
- Data Wrangling and ETL (Python): Programmed automated scripts to gather, assess, clean, and validate unstructured datasets inside a Jupyter Notebook, demonstrating high standards of data quality, consistency, and structural verification.
- Deforestation Exploration (SQL): Formulated complex SQL queries, nested subqueries, and table joins to clean, audit, and analyze global ecological and environmental datasets.

EDUCATION

Bachelor of Business Information Technology

KCA University, Nairobi, Kenya

Expected Graduation: December 2026

- Key Focus: Database management systems, systems analysis and design, business intelligence architectures, programming logic, and network administration.

PROFESSIONAL CERTIFICATIONS

- Udacity ALX-T Data Analyst Nanodegree Program (September 2022 | Credential ID: AGXPDFCG)
- Google Data Analytics Professional Certificate (Data Cleaning, Power BI, Tableau, SQL, and Data Integrity)
- Meta Database Engineer Certificate (Database Architecture, Backups, and SQL Optimization)
- Google Project Management Professional Certificate (Agile Execution & Stakeholder Support)
